Summary

Full Stack Developer with hands-on experience across the MERN stack, cloud platforms, and applied machine learning projects. Proven ability to design scalable web applications, optimize backend performance, and deliver clean, responsive user interfaces. Strong foundation in data structures, problem-solving, and collaborative development within product-focused environments.

SKILLS

Programming Languages: Python, JavaScript, Java, HTML, CSS

Frameworks & Libraries: React, Node.js, Express.js, Bootstrap, Tailwind CSS, OpenCV

DevOps & Cloud: Git, GitHub, CI/CD, Docker, Firebase, Oracle Cloud, Nginx, Netlify, Vercel

Monitoring & Tools: Grafana, VS Code, Jupyter Notebook, Streamlit, Postman

Databases: MongoDB, MySQL

Core Skills: Problem Solving, Data Structures & Algorithms, Authentication, Authorization, RBAC

WORK EXPERIENCE

Mern Stack Developer | Workelate | April 2026 - Present

- Resolved complex system bugs and implemented key UI/UX improvements to enhance overall application performance and usability.
- Developed major feature updates and platform enhancements for Citysense, a Digital Out-Of-Home (DOOH) platform.
- Collaborated directly with the Mexican client to gather requirements, iterate on feedback, and translate their specific needs into scalable technical features.

Software Engineering Intern | Leadmasters.ai | Feb 2026 - March 2026

- Contributed to the development and optimization of the company's core PRM (Patient Relationship Management) platform.
- Built responsive, cross-platform mobile application features utilizing React Native CLI.
- Collaborated with the development team to troubleshoot bugs, participate in code reviews, and improve performance.

PROJECTS

- **Pigeon feed:** Built a Telegram-based job and tech digest engine in **Python** that aggregates listings and dispatches curated updates within 30 minutes. Implemented structured logging and used **Grafana** dashboards for log analysis and basic data visualization to monitor delivery latency, error rates, and content relevance.
- **Lifeease:** Designed and developed an accessibility-focused mobile application using **React Native** and Firebase to support blind, deaf, and speech-impaired users. Implemented voice, gesture, and text-based interaction modes with inclusive onboarding flows to reduce usability barriers and enable adaptive communication across diverse user needs.
- **Online-Auction Platform:** Built a real-time bidding platform using **React** and **Tailwind CSS**, featuring dynamic product listings, live updates, and secure user authentication with **role-based access.** Enhanced interactivity and improved user engagement in test environments by 45%
- **Waste Classifier:** Developed a **CNN-based** Waste Classifier with **90% accuracy** in distinguishing organic and recyclable waste images. Deployed model via **Streamlit**, cutting waste misclassification by 15%.

ACADEMIC HISTORY

Bharat Institute of Engineering and Technology

Bachelor of Technology in Cyber Security | 2023 - 2026 | 75%

Mahaveer Institute of Engineering and Technology

Diploma in Electrical and Electronics Engineering | 2020 - 2023 | 71%

ADDITIONAL INFORMATION

Languages: English, Hindi, Telugu

Certifications: Ethical Hacking | Geo-Data Sharing & Cyber Security (IIRS) | Introduction to Deep Learning (NVIDIA)
